Nationalist Party Platform

We, as the Nationalist Party of Boys Nation 2010, derive our firm standards of morality from our party platform. These beliefs include, but are not limited to, integrity of character, accountability of action and speech, honor of the American citizens’ civil liberties, and the utmost respect and advocacy for Veterans’ rights.

1. Energy

- The Nationalist Party supports the use and development of alternative energy sources in order to both enhance efficiency and reduce detrimental effects on the environment.

- These cleaner energies include nuclear, solar, wind, and geothermal among others. We support the use of tax incentives by the government to entice individuals and corporations alike to adopt these new energies.

2. Foreign Policy

- The Nationalist Party recognizes that the U.S. is first and foremost a peace-promoting power, utilizing force only when deemed necessary in response to a threat to the U.S. or freedom worldwide.

- The Nationalist Party encourages relief and aid to be given/offered to struggling nations through private, philanthropic means and through public-sector appropriations.

- The Nationalist Party is committed to limit the spread of nuclear proliferation for weapons of mass-destruction and to contain the spread of loose nuclear material.

- The Nationalist Party believes in the inherent liberty of every human being and in supporting democracy and spreading the ideals of freedom worldwide through diplomatic and peaceful means.

3. Education

- The Nationalist Party believes that ensuring a well-balanced education for the youth is necessary to ensure a successful future.

- We support the allowing of states to develop their own, well balanced curriculums.

- Emphasis on innovative and creative programs, along with the application of practical skills can be used to promote world-readiness across the spectrum.

- Appropriations towards students in challenging and engaging classes and towards innovative teaching styles and programs should be made through grants available through application and review.
-Federal aid toward those seeking higher education is encouraged by the Nationalist party.

- In addition, the Nationalist Party stands to encourage Federal Aid to be more heavily focused in those fields of Education that will further increase the nation’s ability to compete globally.

4. Economy

- The Nationalist Party recognizes that a healthy economy is necessary for the good of the American people.

- Regulating consumer products to ensure quality and safety, while leaving room for innovation and growth are key points of the Nationalist Platform.

- Incentives such as tax cuts and subsidies can be used to encourage new thought and creativity, and revolutionize American Research and Development.

- Job creation and growth can be achieved through offering contracts to private construction firms to improve and update national roads, bridges, and other infrastructural necessities.

- The Nationalist Party is committed to creating and reclaiming lost jobs through incentives for businesses that will encourage growth and foster the development of new and innovative technologies that will allow the American Economy to remain competitive.

5. Environment

- In regards to the recent BP oil spill, we support making British Petroleum fully responsible for all costs involved with the clean-up process.

- While we support research and development in new clean energies, we also recognize the realistic need for oil drilling, but advocate significant safety precautions be taken in light of the recent oil spill.

- In addition, we advocate the use of remote turn-off valves for all oil rigs, therefore allowing for the prevention of disasters like this in the future.

- We support minimizing our impact on the environment with corporation standards, but also aim not to interfere with profits in the private sector because of those standards.

6. Immigration

- The Nationalist Party believes that tactics to reduce illegal immigration shall be implemented and enforced according to current federal law.
-This shall be done through the use of fair and diplomatic mannerisms such as randomized checks for illegal immigrants and a proper increase of border patrols.

7. Health Care/Social Security

-We support the private sector option of health care to all who want it, but we also want a reasonably priced government option that would force private companies to have to compete for business.

-We support the institution of social security; however we are in support of stringent limitations upon the accessing of social security funds. This includes moving from an operating budget to a capitol budget.

8. National Defense

-We, the Nationalist Party, support a strong domestic defense system.

-We support talks for nuclear reduction of arms among ourselves and other nations like Russia, however, we respect the need for a nuclear arsenal to ensure our protection from aggressors and deter otherwise volatile enemies.
