

SB-13

This bill will protect the environment from the millions of waste vials, needles, and syringes generated in the rush to create herd immunity through COVID-19 vaccinations. It will also promote STEM activities in schools.

IN THE SENATE OF THE AMERICAN LEGION BOYS NATION

Mr. Wiredu of New Jersey introduced the following bill;

A BILL

This bill will protect the environment from the millions of waste vials, needles, and syringes generated in the rush to create herd immunity through COVID-19 vaccinations. It will also promote STEM activities in schools.

Be it enacted by The American Legion Boys Nation Senate assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "COVID-19 Vaccination Materials Repurpose Act".

SECTION 2. DESCRIPTION

Be it hereby enacted that sanitary excess vaccine materials, namely vials, needles, and syringes, be transferred to lab equipment for high school students.

In order to prevent:

- (1) Incineration of vaccine waste by hospitals
- (2) Medical waste firms and sanitary landfills from being overwhelmed
- (3) Millions of medical tools becoming useless

Any open vials or touched materials can not be re-used in schools (adhering to basic health principles), but are expected to be recycled if properly sorted, disinfected, and collected.

SECTION 3. APPROPRIATIONS

The mobilization spurred by this law shall be funded by two main sources: the U.S. Department of Education and the Treasury. These appropriations will cover the cost of transporting clean materials from major vaccination centers to schools, and where necessary, change glass materials to lab equipment.

Additionally, the adoption of this act calls for a sum of no greater than 10,000,000 U.S. dollars (Treasury) to be granted to the U.S. waste services, such as firm OnSite Waste Technologies or Stericycle, to continue turning vaccine waste into noninfectious trash.

SECTION 4. SCHOOL PRIORITIZATION

Such equipment shall be transported to school districts on a need-based agenda. On the grounds that schools with inadequate funding require resources the most.

The order of distribution is up to the discretion of the U.S. Department of Education. The Department of Education is required to carry out enforcement and administration of the Act.
